## INTERNATIONAL PRELIMINARY EXAMINATION REPORT REC'D 18 MAR 2004

REC'D 18 MAR 2004

(PCT Article 36 and Rule 70)

Applicant's or agent's file reference	FOR FURTHER ACTION	See Notification of Transmittal of International Preliminary Examination Report (Form PCT/IPEA/416)						
International application No.	International filing date (day/mor							
PCT/US03/12445	22 April 2003 (22.04.2003)							
International Patent Classification (IPC)	or national classification and IPC	24 April 2002 (24.04.2002)						
IPC(7): H02P 3/22 and US Cl.: 318/380								
Applicant								
BOREALIS TECHNICAL LIMITED		·						
1. This international preliminary examination report has been prepared by this International Preliminary Examining Authority and is transmitted to the applicant according to Article 36.								
2. This REPORT consists of	a total of $\underline{\hspace{1cm}}$ sheets, including	this cover sheet.						
This report is also accompanied by ANNEXES, i.e., sheets of the description, claims and/or drawings which have been amended and are the basis for this report and/or sheets containing rectifications made before this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions under the PCT).  These annexes consist of a total of sheets.								
3. This report contains indica	tions relating to the following it	items:						
I Basis of the report II Priority III Non-establishment of report with regard to novelty, inventive step and industrial applicability IV Lack of unity of invention V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement VI Certain documents cited VII Certain defects in the international application VIII Certain observations on the international application								
	Date	Date of completion of this report						
18 November 2003 (18.11.2003)		09 February 2004 (09.02.2004)

## \*INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International lication No.	
PCT/US03/12445	

I.	Basi	is of the report				
1.	With	regard to the elements of the international application:*				
	$\square$	the international application as originally filed.				
	$\boxtimes$	the description:				
		pages 1-11 as originally filed				
		pages NONE , filed with the demand				
	<del></del>	pages NONE, filed with the letter of				
	$\boxtimes$	the claims:				
		pages 12 and 13, as originally filed				
		pages NONE, as amended (together with any statement) under Article 19				
		pages NONE , filed with the demand				
	<u> </u>	pages NONE , filed with the letter of				
	$\boxtimes$	the drawings:				
		pages 1-5, as originally filed				
		pages NONE , filed with the demand				
		pages NONE , filed with the letter of				
	Ш	the sequence listing part of the description:				
		pages NONE, as originally filed				
		pages NONE , filed with the demand				
_		pages NONE, filed with the letter of				
2.	With	regard to the language, all the elements marked above were available or furnished to this Authority in the				
	These	age in which the international application was filed, unless otherwise indicated under this item.  e elements were available or furnished to this Authority in the following language which is:				
		the language of a translation furnished for the purposes of international search (under Rule23.1(b)).				
		the language of publication of the international application (under Rule 48.3(b)).				
		the language of the translation furnished for the purposes of international preliminary examination (under Rules				
		55.2 and/or 55.3).				
3.	With	regard to any nucleotide and/or amino acid sequence disclosed in the international application, the				
1		national preliminary examination was carried out on the basis of the sequence listing:				
		contained in the international application in printed form.				
		filed together with the international application in computer readable form.				
		furnished subsequently to this Authority in written form.				
		furnished subsequently to this Authority in computer readable form.				
i		The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the				
1		international application as filed has been furnished.				
ļ		The statement that the information recorded in computer readable form is identical to the written sequence listing				
		has been furnished.				
4.	$\boxtimes$	The amendments have resulted in the cancellation of:				
		the description, pages NONE				
		the claims, Nos. NONE				
_		the drawings, sheets/fig NONE				
5. [	_] 7	This report has been established as if (some of) the amendments had not been made, since they have been considered to go				
<u>.</u> .	t	beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).**				
* Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17).						
** A	ny rep	placement sheet containing such amendments must be referred to under item 1 and annexed to this report.				

Form PCT/IPEA/409 (Box I) (July 1998)

Internation No. PCT/US03/12445

V. Reasoned statement under Rule 66.2(a) citations and explanations supporting su	(ii) with rega	rd to novelty,	inventive step or in	idustrial applicability;			
1. STATEMENT	Atta State	,					
Novelty (N)	Claims	*		YES			
	Claims	NONE		NO			
Inventive Step (IS)	Claims			YES			
	Claims	NONE		NO NO			
Industrial Applicability (IA)	Claims			YES			
	Claims	NONE		NO			
Claims 1-4 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest a regenerative braking circuit using a mesh array of resistors connected to an inverter in a manner similar to that of a motor connected to the inverter, such that, when it is desired to brake the motor and to dissipate the regenerative energy, the harmonic content of the inverter output can be adjusted, thus placing voltage differences across the resistor array and causing current to flow in the resistors.  Claims 1-4 the criteria set out in PCT Article 33(4), and thus meet the industrial applicability because the subject matter claimed can be made or used in industry.
